

# Product Update- New underlying investment manager for the OnePath Global Emerging Markets Shares Fund

November 2014

In June 2014, Massachusetts Financial Services Company (MFS Investment Management) replace UBS Global Asset Management (Australia) Ltd as the underlying investment manager of the OnePath Global Emerging Markets Shares Fund (the Fund).

## Which products are affected by the changes?

- Allocated Annuity
- Deferred Annuity
- DIY Super Investments
- Investment Savings Bond

## Why replace the underlying investment manager?

ANZ Wealth's internal investment research team regularly reviews and monitors the underlying investment managers of the investment funds offered by OnePath. Regular reviews assist in ensuring underlying investment managers' performance continues to meet the needs of our current and future investors.

## Why was MFS Investment Management selected?

A thorough and rigorous research-based due diligence process was undertaken by ANZ Wealth's internal investment research team in the selection of the replacement underlying investment manager.

Following a thorough review, MFS Investment Management (known as MFS on this document) has been chosen because:

- its investment team is well placed, relative to peers, to deliver strong results over the shorter and longer term
- it is currently highly rated by external research houses, and
- historically, it has demonstrated strong risk-adjusted investment returns.

## Who is MFS?

MFS is a subsidiary of Sun Life Assurance Company of Canada.

As of 31 December 2013, MFS managed AUD \$461 billion for millions of individuals and hundreds of institutions in more than 75 countries.

## Important information for existing investors

### When did MFS take over as the underlying investment manager?

The transition to MFS as the underlying investment manager took place in June 2014.

### Was there be any transition costs incurred in the move to MFS?

Transition costs, such as brokerage costs, are typically incurred at the time of transitioning from one underlying investment manager to another. The transition process involves buying and selling securities in order to align the Fund's current portfolio of investments with MFS's portfolio composition. These transition costs will be borne by the Fund.

OnePath expects that the medium-term benefit of improved fund performance to existing investors will significantly outweigh the one-off costs associated with the transition.

### What aspects of the Fund remain unchanged?

There will be no change to:

- the Ongoing Fee for investors at this time (however this may change in the future)
- the investment objective and investment strategy of the Fund
- the investor profile and risk measure
- buy/sell spread for future client transactions, and
- asset class exposure.
