

# ONEANSWER INVESTMENT FUND PROFILE CHANGES

## Continuous Disclosure Notice | 14 December 2019

This Continuous Disclosure Notice provides important information for current investors of OneAnswer Investment Portfolio (including Frontier and //Select).

### WHAT ARE THE CHANGES?

Some investment funds offered through OneAnswer recently had their fund profiles changed by the underlying external fund managers which are reflected in the reissued OneAnswer Product Disclosure Statements (PDSs) dated 14 December 2019.

The changes to the Funds' investment profiles are outlined in the tables on the following pages.

### WHAT DO THE CHANGES MEAN FOR INVESTORS?

Investors may consider speaking with their financial adviser about the changes to the investment profile(s) of the fund(s) they are invested in and whether the fund(s) still meets their financial needs and objectives.

### UPDATED INFORMATION

#### 1. Schroder Fixed Income

	Previous	New
<b>Investment strategy</b>	<p>Investment strategy Schroders' broad fixed income philosophy is underpinned by 3 key ideas:</p> <ul style="list-style-type: none"> <li>• Fixed income is typically held for defensive purposes. These include liquidity, capital preservation, liability management and to diversify equity risk.</li> <li>• Investors should utilise the breadth of the fixed income universe to improve risk/return outcomes (as opposed to closely tracking arbitrary benchmarks).</li> <li>• Volatility is not risk; Schroders view losing money and not delivering on objectives as its core risk.</li> </ul> <p>These key investment beliefs are encapsulated in our Schroders Fixed Income Fund, a Core-Plus strategy which combines a low active risk 'Core' and 'Plus' strategies where opportunities to add value is present. The fund utilises the breadth of the opportunity set and combines asset allocation, country selection, credit risk management, stock selection, and duration/yield curve management in a combination that aims to outperform the benchmark Bloomberg AusBond Composite 0+Yr Index over the medium term whilst ensuring it remains a true defensive strategy.</p>	<p>The Schroder Fixed Income Core-Plus Strategy is an actively managed, diversified strategy that invests in a range of domestic and international fixed income assets with the objective of outperforming the Bloomberg AusBond Composite 0+Yr Index. While the bulk of returns are expected to come from income generated by Australian investment grade assets, the Strategy seeks to enhance returns and manage risk by assessing the broad range of fixed income investment opportunities through a robust asset allocation framework and accessing these opportunities through Schroders' global network. Investments within the portfolio are actively managed with the aim of ensuring we hold the right assets and securities at the right time to maximise returns while maintaining a low risk profile. The targeted result is a defensive strategy which is broadly diversified with low correlation to equity markets.</p>

## 3. Antipodes Global (Long only)

	Previous	New
<b>Description</b>	This fund may be suitable for investors with an investment horizon of five years or more and who seek capital growth and income via exposure to global stocks and are willing to accept the shorter term fluctuations in price typically associated with such investments.	The fund typically invests in a select number of attractively valued companies listed on global share markets (usually a minimum of 30 holdings). The fund may use exchange traded derivatives to achieve long equity exposure. In the absence of finding individual securities that meet Antipodes' investment criteria, cash may be held. The fund aims to provide income and some capital growth over the long term.

	Previous	New
<b>Investment strategy</b>	The fund typically invests in a select number of attractively valued companies listed on global share markets (usually between 20 and 60). The fund is also permitted to utilise exchange traded derivatives for risk management purposes subject to the specific restrictions that such derivatives cannot be used to gear portfolio exposure and that the underlying effective face value is limited to 10% of the NAV of the fund unless used to manage currency risk. Currency exposure will generally reflect the currency of the underlying securities. However, where the Investment Manager believes there is a strong likelihood of a decline in the	Antipodes believes that equity investment returns are primarily a function of economic performance of the business and the resilience of this performance, and price paid or starting valuation at the time of purchase. Antipodes' investment approach in practice can be broken down into four iterative steps. <ul style="list-style-type: none"> <li>• Identify: Antipodes utilises a variety of quantitative and qualitative inputs combined with many years of experience to generate ideas.</li> <li>• Test: Once an opportunity has been identified, Antipodes performs an initial reality check before committing a large amount of research resource.</li> <li>• Analyse: Antipodes' broad approach is</li> </ul>
